

SRO 4.2.2.4 new features

Set-up

- Enhancements when renewing to a different membership; membership upgrades and membership exchanges

Reporting

- 'Locked Seats' report now supports Allocations as well as Locks
- Ticket Details Wizard report includes descriptive text of the output columns to assist with understanding how some of the values are calculated
- Client / Owner image available in certain Wizard Report outputs
- 'Total Price' available in some Wizard Reports. Total Price = list price – item discount tax item commission
- Filter and Output on Sales Mode Group in some Wizard Reports, e.g. Group
- Sales Mode Walk Up and Telephone as 'Box Office'
- % Sold output in Ticket Details base report
- Private Property filter in Event Sales base report
- Auto Renewal filter and Mandate outputs in Membership / Subscription base report
- Remarks in Client Summary base report

Batch Printing

- Queue batch printing
- Email notification when batch printing completes
- Batch print by Price Type – E.g. print Student tickets only
- Retain existing Barcode when batch reprinting Memberships
- Batch print Audit details

eSRO – interface 1505 (AKA responsive interface) only

- Enhanced Merchandise functionality, utilizing the Inventory Management functionality introduced in earlier releases
- Merchandise personalization
- Enhanced Facebook / Google login support
- Enhancements in sending individual tickets to separate email addresses
- Display seat numbers in the seat plan
- Year / Month / Day drop down lists for Date of Birth (as opposed to a calendar tool)
- Area availability toggle

bSRO

- Transaction Summary window at the end of the transaction
- Membership notification in Information Pod

tSRO

- Up-sale prompts
- Display client image
- Edit and Confirm a reservation
- Change capacity of General Admission event
- Membership notification in Information Pod

Fundraising

- Donation Benefits, similar to Membership Benefits, utilizing the Rules Engine
- Assign staff to certain CRM clients and set individual targets

GDPR

- Ability to Anonymize a client from within CRM
